Tools for Requirements Management, Quality Assurance and Software Planning

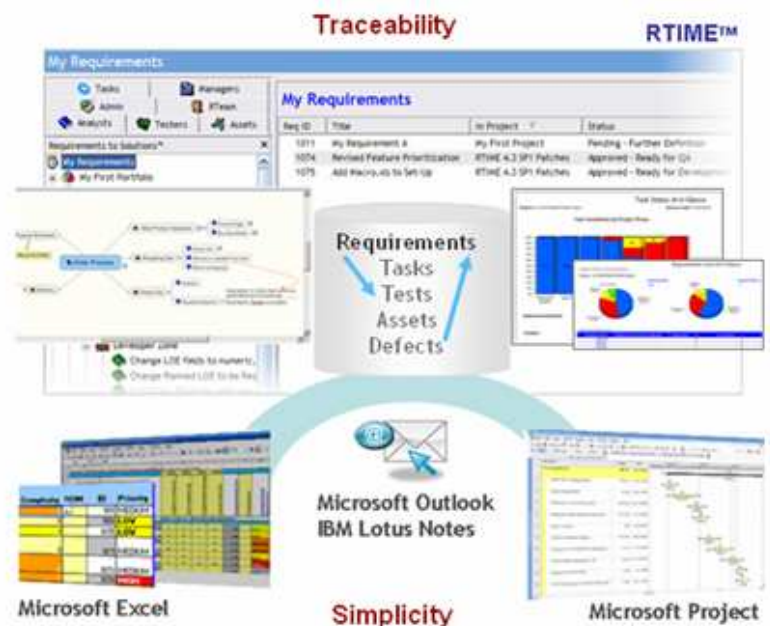

Typical software project challenges:

- Requirements prioritization and dependency management methods
- Rework due to miscommunication
- Disparate information in multiple planning and tracking tools
- Lack of visibility by all participants and stakeholders
- Ensuring test case coverage and traceability to reduce post-release defects

RTIME™ , by QAVantage addresses these challenges by:

- Providing requirement prioritization and impact analysis tools for more efficient planning and decision making
- Improved communication: Breakthrough Visual Requirements Management™ with MindManager Integration
- Providing a single, centralized source of project information
- Ensuring traceability by mapping business requirements to all project artifacts
- Eliminating rework due to miscommunication with workflow, notifications and real-time collaboration tools
- Providing stakeholder visibility through dashboards and reporting
- Delivering an easy to use, affordable tool that works with the other office tools you are already use to

RTIME™ Capabilities

Requirements Management

- Define, Track, Trace Requirements
- Feature Prioritization and Trade-off Analysis Tools
- Issue Management

Project Management

- Portfolio (Product Line) Management
- Project (Release) Management
- Release timeline projections
- Integrates with MS Project

Asset/Knowledge Management

- Requirement traceability to components, Documents, Modules

Test Case Management

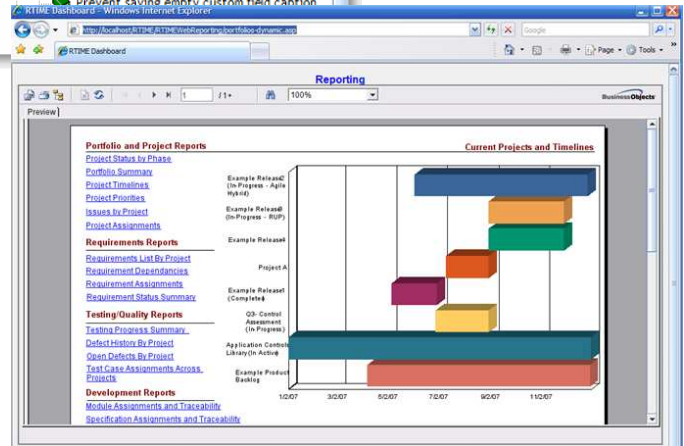

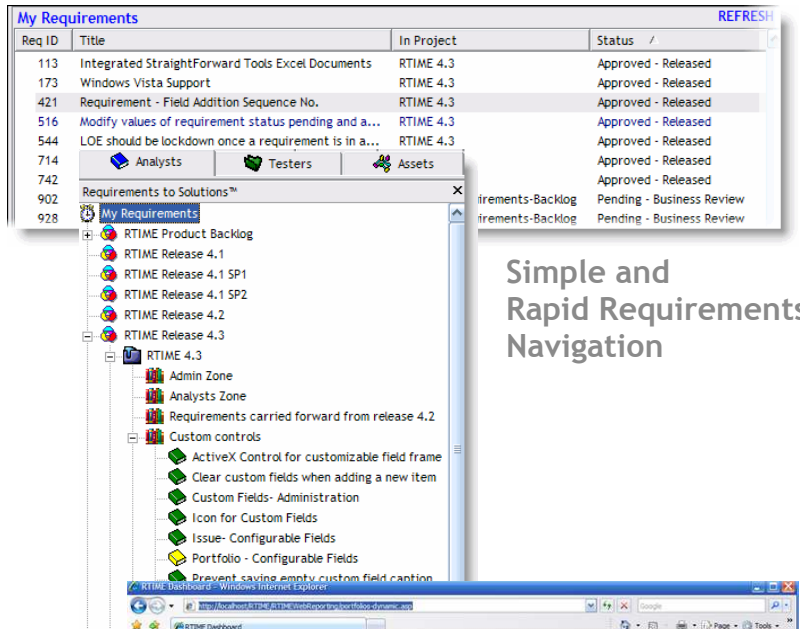

- Test Case definition and requirement mapping
- Test Case Reuse
- Defect Management - inherent and integrated
- Test Steps Creation by Business Users

Collaboration and Ease of Use

- Shared documents (Files and URLs)
- Advanced Search
- Filter based and Dashboard level reporting
- Cut/Copy/Paste
- Built In Instant Messaging and Logging
- SmartChat-Group/Individual
- E-mail Notifications (Outlook/LotusNotes/SMTP)
- Directory Assistance

Easy Administration/Configuration

- Release calendar
- Team Member Definition
- Configurable fields and system settings

Optional Plug-N-Play Appliance for rapid implementation

About QAVantage

QAVantage is a software and consultative services company headquartered in Red Bank, NJ, USA and makers of RTIME™. RTIME is a software solution used by our customers to plan, track and manage software projects including commercial software, off-the-shelf software roll-out projects and software application development and customization projects.
